

Exercise No. 4
PHYSICAL PLANT, FACILITIES, AND EQUIPMENTS

Name:	Group Number:	Score:
Year and Section:	Date:	

Plant facilities, equipments, and other materials of the hospital pharmacy must comply with the Food and Drug Administration (FDA) minimum standard requirements for the issuance of License to Operate (LTO) in the establishment of Hospital Pharmacy.

Adequate spaces, equipments, and supplies are provided for the professional and administrative functions of Pharmacy Service to assure patient safety through proper storage and preparation (compounding, packaging, and labeling).

I. Objective:

To identify the various plant facilities, equipments, and other materials of the hospital pharmacy.

II. Procedures:

1. Draw at least five (5) facilities and (5) equipments used in the hospital pharmacy for the convenience of the staff and patient. Give the function/s of each facility and equipment.

III. Data:

I. Illustrate the different facilities and equipments used in the hospital pharmacy including their functions.

IV. Questions:

1. Describe the physical plant in hospital pharmacy.
2. Describe the utensils, apparatuses, and other equipments used in the compounding and manufacture of drugs in the hospital pharmacy.
3. List down the reference materials and pertinent documents needed in the hospital pharmacy area.
